Three Essays on the Health Impacts of Water Quality and Sanitation in Developing Countries

Research

Refereed Publication

The Benefit of Clean Water on Child Health: An Empirical Analysis with Specific Reference to *Escherichia Coli* Water Contamination (with Yuko Nakano and Midori Matsushima). ***Water Resources and Economics***. doi.org/10.1016/j.wre.2024.100249

Working Papers

Impact of Access to Improved Sanitation on Child Health in Pakistan.(with Yuko Nakano and Midori Matsushima). Tsukuba Economic Working Paper No.2022-003. <https://pepp.hass.tsukuba.ac.jp/RePEc/2022-003.pd>. [Abstract](#) (*under review*)

Effects of Community-level Sanitation on Women Hemoglobin levels: Evidence from Sub-Saharan Africa (Job Market Paper)(with Yuko Nakano and Midori Matsushima). [Abstract](#) (submitted to a journal for peer-review)

Work in Progress Research Projects and Activities

The Educational Toll of Anemia: Evidence from Adolescents in India (with Takashi Kurosaki) (submitted to a journal for peer-review)

Effect of Anemia on Adult Labour Supply in India (with Takashi Kurosaki).

Capacity of Commune Health Centers to Provide Primary Healthcare Services under Post-COVID-19 in Phnom Penh, Cambodia 2023-24.(PIs: Hiroyuki Yamada, Midori Matsushima). I work as a co-researcher and a paper from this project titled “Health of Pregnant Women: Its Association with Pregnant Women and Health Workers’ Behavioral Preferences (with Midori Matsushima and Shusaku Sasaki)” is produced. Based on the comments from the seminars and 19th Japan Health Economic Association (JHEA) Conference 2024, the manuscript is revised and shortly will be submitted to a journal.

Economics of NGO-Academia Collaboration in Africa: Toilet Project in Madagascar 2022-2025. (PIs: Hiroyuki Yamada; Midori Matsushima). I contributed to questionnaire development, visited the field, and organized the data for the 2022-2024 rounds. The last round of 2025 is at the cleaning and organizing stage.

Optimizing community-health-worker resources to scale child nutrition programs in Rural Pakistan(PIs: Abu S. Shonchay, Takashi Kurosaki, Uzma Afzal, Agha Ali Akram, Akib Khan). The project is conducted in 199 villages of Tando Muhammad Khan district, Sindh Province, using a Home-Based Growth Monitoring intervention to cope with child stunting. As a co-researcher in this project, I am working on organizing the baseline- to- endline data, and taking part in other project activities.

Effects of Trust & Interaction with doctors on online healthcare seeking in 25 countries(with Hamza Umer, Muhammad Salar Khan).

Effect of domestic violence and patriarchy on gendered education and health disparities in Pakistan (with Hamza Umer). In this project, we aim to examine how domestic violence(psychological and physical violence) and patriarchal power structures within households affect boys and girls differently in terms of their education and health.
